

Mitigating Anchoring Bias in Long-Term Auditor Engagements

An EFA-Based Validation Study

Yasir A. Malik · PID 1687105 · FIU DBA Cohort 7.16

GEB7913 · Advisor **Prof. Dr. Juan Rey** · IRB IRB-25-0462

The study. Which audit-process interventions most effectively reduce **anchoring bias** in long-term (multi-year) auditor engagements — and do they work directly, or through judgment-quality and process-rigor pathways? Eleven constructs, sixteen hypotheses, validated by exploratory factor analysis and mediation on a target of 60–80 audit professionals.

Figure 1 — Eight interventions → two mediators → reduction in anchoring bias.

■ Status snapshot

Piece	State
Survey built + published in Qualtrics (73 items)	■ LIVE
Verified end-to-end on mobile	■
CloudResearch recruiting project (15 × \$6, US, \$90)	■ Draft built
Peer review #1 — wording (CPA/CFA/FRM)	■ Incorporated → v2.1
Peer review #2 — methodology	■ Addressed (Limitations section)
Dr. Rey methodology meeting	■ Thu Jul 2, 11 AM
Data collection → EFA → manuscript	■ Jul 1–19

■■ Timeline

When	Milestone	Status
Jul 1	Survey LIVE + CloudResearch draft	■
Jul 2, 11 AM	Dr. Rey methodology meeting	■

When	Milestone	Status
Jul 2–3	Finalize → fund → soft-launch (data begins)	■
Jul 3–8	Scale to n = 60–80	■
Jul 9–10	Clean data	■
Jul 11–13	EFA + mediation	■
Jul 14–17	Write Results + Discussion	■
Jul 18–19	Submit final manuscript	■

■ The instrument

11 constructs × 5 items = **55 construct items**, + 2 attention checks, 5 screeners, a context control, an open item, and demographics → **74 respondent-facing items**. 5-point Likert (decision documented vs 7-point).

File	Purpose
Full_Survey_Questionnaire_v2.md	Reviewed instrument (v2.1) + change log
Qualtrics_Survey_Import.txt	One-click Qualtrics import (Advanced Format)
Qualtrics_Codebook_and_Setup.md	Reverse-code map + 7-step post-import setup

■ Peer review → 04_Peer_Review/

File	Purpose

■ Recruitment & launch → 03_Recruitment_and_Pilot/

File	Purpose
LIVE_Survey_Status.md	Live link + before-launch checklist
CloudResearch_Setup_Guide.docx	8-step launch (primary recruiting route)
Informed_Pilot_Run_Plan.docx	Pilot (6–10 auditors) + 6 decision gates

■ Advisor & meeting → correspondence/

File	Purpose
2026-06-30_Rey_meeting_July2_request.md	July 2 meeting email + agenda
Milestones_and_Timeline.md	12 milestones with gates

■ Methods at a glance

- **Sample:** 60–80 US audit professionals via CloudResearch (MTurk backup).
 - **Analysis:** EFA (PAF, rotation, KMO + Bartlett + parallel analysis); reliability $\alpha \geq .70$; mediation via PROCESS Model 4 (5,000 bootstraps).
 - **Theory lens:** dual-process theory via the anchoring-and-adjustment heuristic.
 - **Rigor remedies:** anonymity, reverse items, block randomization, attention checks; planned Harman's test + marker variable for common method bias.
