Faculty Recruitment — Lecturers and Adjuncts

Rutgers, The State University of New Jersey

Rutgers Business School (Newark and New Brunswick) · Rutgers-Camden School of Business · School of Communication and Information

Re: Lecturer / Adjunct (Part-Time), 2026–27 academic year

Dear Hiring Committee,

I am applying to teach at Rutgers in the 2026–27 academic year, in any term where you have need: Fall 2026, Winter Session, Spring 2027 or Summer 2027. My first interest is the Accounting and Information Systems unit, and I would be glad to be considered for Finance and Economics, Information Technology and Analytics, or Management Science and Information Systems as well. I live in Newark, a few minutes from the Washington Park campus, and I can teach in Newark, New Brunswick or Jersey City, in person, hybrid or fully online.

What I would bring into the room is a career spent doing what the syllabus describes. I spent five years as a Vice President in Citi's Internal Audit function, leading risk-based audits across fifteen-plus business units and reporting findings to executive management and a Board Audit Committee. Before that I was at JPMorgan Chase, where I coordinated 50+ stakeholders on the firm's resolution-plan submissions to the Federal Reserve and FDIC and worked on Basel III capital reporting. Before that I was a bank examiner for the Florida Office of Financial Regulation, conducting safety-and-soundness examinations jointly with the FDIC and the Federal Reserve. When a student asks what a regulator actually does when they walk into a bank, I can answer from having been the person walking in.

Accounting information systems is the course I have lived. Internal controls, data governance, risk assessment, transaction cycles and the systems that carry them were the substance of my audit work. At Citi I consolidated more than 500 legal-entity data sources into governed master data for regulatory reporting, and later designed and deployed a retrieval-augmented AI review assistant that reduced review cycle time by about 35%, with an AI governance framework proposal written alongside it. I can build an online, asynchronous section in Canvas around real cases of how these systems work and how they fail.

I am also a doctoral candidate researching the thing your students will graduate into. My DBA at Florida International University examines anchoring bias in LLM-assisted audit judgment: how professional judgment shifts when a model supplies a confident starting point, and what a practitioner must do to show that independent judgment was still exercised. I passed the qualifying examination in July 2026 with a survey-based measurement study fielded under IRB approval (IRB-25-0462); a qualitative proposal is being developed alongside it in coursework.

On teaching, I am returning to something I started rather than trying it for the first time. During my MBA I was a Lab Assistant in FIU's State Farm Financial Literacy Lab, working with participants one-to-one and in small groups, and I was a paid tutor in corporate finance and accounting at the Student-Athlete Academic Center, teaching to hard deadlines with eligibility riding on them. I also provided instructional support for FIN 6644, International Financial Markets. Since then I have trained and coached auditors at two global banks in workpaper review, testing methodology and judgment quality. What I have not yet done is carry a semester-long university course from syllabus to final grades, and I would welcome co-instruction or a section alongside a faculty mentor for a first term.

Courses I am prepared to teach: Accounting Information Systems; Auditing and Internal Auditing; Internal Controls and SOX; Enterprise Risk Management; Financial Regulation and Bank Supervision; International Financial Markets; Data Analytics for Accountants; AI Governance and Responsible AI in Business; Behavioural Accounting and Judgment and Decision-Making.

Rutgers is the university in my own city, and the students in Newark are the ones I would most like to teach, many of them heading into the audit, risk and compliance roles I have spent my career in, at firms twenty minutes away. Professor William Newbury of Florida International University has agreed to write in support of this application. I would be glad to discuss where I could be most useful.

Sincerely,

Yasir A. Malik
