SUMMARY

Audits the function he used to run. At JPMorgan Chase his title was **Risk Control Manager, Treasury & CIO** — he owned the first-line control framework for the capital and liquidity activities this seat examines, defined the supervisor expectations and escalation paths, and automated the reconciliations behind them (~40% less manual review). He also led **CCAR** forecast validation and quantitative model challenge over a **\$2.6T** balance sheet under SR 15-18, owned Basel III RWA and capital adequacy reporting for a **\$50B** book, and ran Resolution & Recovery Planning into Federal Reserve and FDIC submissions. The audit craft is the other half: five years as VP, Audit Manager at Citi Internal Audit leading risk-based audits across **15+ business units**, with consent-order issue-closure evidence accepted by quality assurance and external regulators — and, before all of it, CAMELS safety-and-soundness examinations as a bank examiner with the Florida Office of Financial Regulation. Every column of this audit universe has been seen from both sides of the control.
