Firm Risk Management — Recruiting

Morgan Stanley

New York, NY

Re: Capital & Data Risk / IM Risk (Risk Management) — Vice President

Dear Hiring Team,

I am applying for the Capital & Data Risk Vice President role in Firm Risk Management. Capital adequacy and the data that feeds it are the two halves of my career, and I rarely see them asked for in one seat.

**Capital risk, from the inside.** At JPMorgan I owned **Basel III RWA and capital adequacy** reporting across a **\$50B** portfolio of equities, fixed income, and OTC derivatives — identifying **\$180M** in capital optimization — and led **CCAR** forecast validation and qualitative model challenge across a **\$2.6T** balance sheet under **SR 15-18**. I directed **Resolution & Recovery Planning** across 50+ stakeholders, delivering regulator-ready submissions to the Federal Reserve and FDIC that contributed to a "not not-credible" rating.

**Data risk, with evidence.** At Citi I centralized **500+ legal-entity data sources** into governed master data, enabling automated **FR 2900 and TIC** filings at **99.8%** accuracy — data governance measured by whether a regulatory filing can be wrong. As VP Audit Manager (2021–2026) I then audited integrated business and technology risk across 15+ business units and led consent-order issue validation accepted by Federal Reserve examiners.

**The AI dimension your risk stack is acquiring.** I authored an AI governance framework referencing **NIST AI RMF** and **SR 11-7**, built a production **RAG** assistant that cut audit review time ~35%, and I am a **DBA candidate at FIU (expected 2028, GPA 3.81)** whose research examines bias in expert judgment — a completed IRB-approved study on anchoring, and a dissertation in development on **automation bias in AI-assisted decisions**. As model- and AI-driven measures enter capital and investment-management risk, that is the oversight lens the second line will need. I began my career as a state bank examiner with the Florida Office of Financial Regulation.

I interviewed with Morgan Stanley's Model Risk organization this summer and came away wanting to work here; I would welcome the chance to continue that conversation in Firm Risk Management.

Sincerely,

**Yasir A. Malik**
