

YASIR A. MALIK

AI Assurance & Model Risk Executive | Internal Audit | Responsible AI Governance

Newark, NJ • YasirAMalik@gmail.com • +1 (786) 704-8536 • linkedin.com/in/yasiramalik • github.com/AuditingAI

SUMMARY

AI assurance and audit executive with 15+ years across Citi, JPMorgan, and the Florida Office of Financial Regulation, with examination experience alongside federal banking regulators. Built independent assurance over enterprise AI/GenAI adoption — governance, model risk (SR 11-7), bias and fairness, hallucination, adversarial robustness, and third-party AI — and embedded AI-enabled audit accelerators that cut cycle time **35%**. Track record influencing examiners and audit committees on consent-order remediation, CCAR forecast validation across a **\$2.6T** balance sheet, and Resolution & Recovery Planning that achieved the Federal Reserve's "not not-credible" rating. DBA candidate (FIU, GPA **3.81**, expected 2028) researching bias in auditor judgment, extending to LLM-assisted decisions. Founder, *Audit the Algorithm* — AI governance advisory for regulated financial services.

Core domains: AI/GenAI assurance • Model Risk Management (SR 11-7) • NIST AI RMF • EU AI Act • ISO/IEC 42001 & 23894 • Internal Audit (IIA / 3LOD) • Responsible AI • CCAR, RRP, Basel III • Consent order remediation • Regulator engagement (state and federal banking regulators).

Most relevant skills (per current market): Control monitoring • Risk-based audit planning • Issue management • Root cause analysis • AI model validation • MLOps awareness • XAI (SHAP / LIME) • RAG architecture • Human-in-the-loop control design • Audit committee and regulator communication.

PROFESSIONAL EXPERIENCE

Vice President, Audit Manager — Cross-Enterprise Program & Change Management

Citi • New York, NY • Jul 2021 – Apr 2026

- Led consent-order audit execution strategy across enterprise change programs; validated and closed high-priority regulatory findings, aligning evidence with **Federal Reserve** examiners and improving the firm's standing on issue durability and sustainable closure.
- Directed global audits of strategic transformation initiatives across **15+ business units**, assessing program governance, third-party oversight, data integrity, and regulatory reporting effectiveness; strengthened supervisory readiness for regulatory challenge.
- Designed and shipped a **RAG-based Workpaper Quality Assistant** that cut audit cycle time **~35%**, embedding NIST AI RMF, SR 11-7, XAI (SHAP/LIME) explainability, and human-in-the-loop controls so the AI tool was itself auditable — addressing bias, fairness, hallucination, and adversarial-input risks at design time.
- Defined the AI/GenAI tooling roadmap for Internal Audit: use-case intake, model risk tiering, control library, and post-deployment monitoring KPIs (adoption, coverage expansion, cycle-time reduction, exception

rate).

- Mentored **8+ auditors** on responsible AI adoption, prompt engineering, and ethical decision-making in human–AI workflows; recognized with Citi's '*Delivers with Pride*' award for AI-powered audit quality assurance innovation.

Risk Control Manager — Treasury & CIO (Capital, CCAR & RRP)

JPMorgan Chase • Jersey City, NJ • *Mar 2019 – Jun 2021*

- Redesigned the enterprise capital control framework across Treasury and CIO, replacing manual, reactive controls with a centralized governance model and real-time feedback via CORE — improving control effectiveness and audit readiness.
- Led **CCAR** forecast validation and qualitative model challenge over a **\$2.6T** balance sheet, aligning with SR 15-18 and Federal Reserve expectations; automated reconciliations reduced manual review time **40%**.
- Directed **Resolution & Recovery Planning (RRP)** across **50+** cross-functional stakeholders, delivering regulator-ready submissions to the Fed and FDIC; strengthened governance, scenario analysis, and documentation standards.

Capital Controller — Basel Measurement & Analytics

JPMorgan Chase • Brooklyn, NY • *Sep 2017 – Feb 2019*

- Owned Basel III RWA calculations for a **\$50B** equity book (~**\$35B** RWA), decomposing trades to line-item exposures across fixed assets, securities, OTC derivatives, and embedded asset classes for optimal risk weighting.
- Identified **\$180M** in capital optimization opportunities through granular portfolio analysis and risk-weight reassignment.
- Built analytical models forecasting capital impact of strategic initiatives, supporting CFO-level decisions on capital allocation.

Program Manager — CIB Resolution & Recovery Planning

JPMorgan Chase • New York, NY • *Mar 2015 – Sep 2017*

- Coordinated firm-wide resolution planning across Legal, Treasury, and Operations; managed cross-functional dependencies on regulatory deliverables to the Fed and FDIC.
- Contributed materially to the firm's "**not not-credible**" rating from the Federal Reserve — a critical regulatory milestone requiring demonstration of resolvability under stress.

Assistant Vice President — Global Legal Entity Management

Citi • Tampa, FL • *Apr 2012 – Mar 2015*

- Centralized **500+** legal entity data sources into a single source of truth, eliminating reconciliation breaks across treasury, risk, and regulatory reporting.
- Automated **FR 2900 and TIC** regulatory filings, achieving **99.8%** accuracy and reducing filing prep time materially.

- Partnered with Compliance and Legal to standardize entity classifications, KYC linkage, and intra-group exposure reporting.

Bank Examiner — Safety & Soundness

Florida Office of Financial Regulation • West Palm Beach, FL • *Apr 2011 – Mar 2012*

- Conducted joint examinations of state and national banks using the **CAMELS** framework — capital adequacy, asset quality, management effectiveness, earnings, liquidity, and sensitivity to market risk.
- Authored examination workpapers and supported formal enforcement actions, remediation directives, and follow-up reviews for complex institutions.
- Completed FDIC Corporate University Bank Examiner I training.

Senior Business Analyst — Retail Credit Risk

Royal Bank of Scotland • Dubai, UAE • *Jan 2008 – Jun 2009*

- Built dynamic credit-risk MIS dashboards for a **\$500M+** retail portfolio across the Middle East using Excel/VBA, SAS, and SQL; supplied weekly decisioning input to portfolio leadership.

DOCTORAL RESEARCH & EDUCATION — Epistemic Risk & AI Governance

Doctor of Business Administration (DBA), in progress — Florida International University • Expected 2028
• GPA **3.81**

Qualifying research completed Jul 2026: Mitigating Anchoring Bias in Long-Term Auditor Engagements (IRB-25-0462). Dissertation in development — how auditor reasoning degrades under LLM assistance, with proposed control mechanisms aligned to SR 11-7 and NIST AI RMF.

MBA, Financial Mathematics (GPA 3.8) — Florida International University • 2011

Pre-MBA, International Banking — Florida International University • 2007

B.Sc. Banking & Finance — London School of Economics (LSE) • 2005

FinTech Boot Camp — Columbia University • 2021

AI Catalyst Program (6-month immersive) — GrowthSchool • 2024–25

Certifications & training: FDIC Bank Examiner I • Registered Scrum Master • GCP Human Subjects Research (AI Ethics).

In progress / targeted: CIA, CISA, CRISC (per IIA & AI-audit market expectations).

ENTREPRENEURIAL & ADVISORY

Founder — Audit the Algorithm (auditingai.github.io) • 2024 – Present

AI governance advisory for banks, asset managers, and fintechs. Services: bias detection, drift and sycophancy prevention, regulator-defensible AI control frameworks (NIST AI RMF, SR 11-7, EU AI Act), RAG

and document-intelligence pilots, and human–AI workflow design.

TECHNICAL CAPABILITIES

AI / ML & Agentic: Python • PyTorch • TensorFlow • Scikit-learn • LangChain • LangGraph • CrewAI • RAG and Agentic RAG • Vector DBs (Pinecone, ChromaDB) • LLM fine-tuning • Prompt engineering • Model Context Protocol (MCP) • ReAct / Reflexion patterns • Hugging Face • Google ADK.

AI Governance & Model Risk: NIST AI RMF • SR 11-7 • ISO/IEC 42001 & 23894 • EU AI Act • Colorado AI Act • Bias detection and mitigation • XAI (SHAP / LIME) • Model validation and drift monitoring • AI red teaming • Fairness testing • Audit-trail design • LLM usage monitoring for regulated workflows.

Audit & Risk Frameworks: IIA Standards • 3LOD • COSO • COBIT • SOX ITGC • CAMELS • Basel III • CCAR / SR 15-18 • Resolution & Recovery Planning • Consent-order remediation.

Data & Cloud: SQL • SAP • Tableau • Alteryx • Power BI • Excel/VBA • AWS SageMaker • OpenAI API • Anthropic Claude API • Claude Code • Codex • Gemini CLI.

INTERESTS

Calisthenics & HIIT • AI automations (n8n) • Competitive chess • Cognitive science and applied epistemology • Mentoring and guest lecturing (FIU).

"The measure of intelligence is the ability to change." — Albert Einstein

And the measure of AI governance is knowing when that change becomes drift.
