PROFILE

Former JPMorgan Chase **Program Manager in the Commercial & Investment Bank** and first-line **Risk Control Manager**, returning to CIB control management with five years of Internal Audit leadership at Citi behind him. Turns complex control and risk information into **decision-ready governance materials** — what changed, why it matters, the decision required, the key risks and controls, and the actions. Ran **governance forum execution** and executive reporting cadences for Resolution & Recovery Planning across **50+ stakeholders** in Legal, Treasury, Technology and Operations; tracked issues, findings and remediation to closure under a regulatory consent order across **15+ business units**; and applies disciplined **data quality assurance** — reconciliations, completeness checks, trend and reasonableness testing — before a number reaches a senior leader. Uses **generative AI** to accelerate drafting and summarisation, with rigorous human validation; built the AI tool himself.
