

Yasir A. Malik

Doctoral Candidate (DBA) · Practitioner-Scholar in Auditing, Risk & AI Governance

NYC Metro / Newark NJ · ymali001@fiu.edu · [LinkedIn: CONFIRM URL] · [Phone: CONFIRM]

Profile

Doctoral candidate researching **cognitive bias in audit judgment and the governance of AI-assisted decision-making**, bringing 15 years of audit and risk leadership practice at Citi and JPMorgan — including service as a bank examiner with the OCC, Federal Reserve, and FDIC — into the classroom. Built and deployed a production RAG/AI tool inside Citi's audit function (35% cycle-time reduction), giving students a rare bridge between auditing theory, behavioral research, and the AI tools reshaping the profession. Seeking assistant professor / adjunct appointments in accounting, auditing, or business analytics.

Education

Doctor of Business Administration (DBA) — Florida International University, College of Business

In progress; entered Spring 2024 · GPA 3.81 · Qualifying research project completed July 2026

Dissertation (in development): *AI-augmented audit judgment — do algorithmic decision aids attenuate human anchoring or introduce algorithmic anchors of their own?*

[CONFIRM: Master's degree — institution, field, year]

[CONFIRM: Bachelor's degree — institution, field, year]

Research

Qualifying study (2026): *Mitigating Anchoring Bias in Long-Term Auditor Engagements* — developed an 11-construct, 55-item measurement model (8 organizational interventions, 2 mediating conditions, outcome) with 16 hypotheses grounded in dual-process theory; IRB-approved (IRB-25-0462); instrument fielded via Qualtrics; executed as a pilot/feasibility study with a fully specified EFA→CFA→PLS-SEM analysis pipeline. Full manuscript ~16,000 words.

Research agenda: the interaction of AI/LLM audit tools with practitioner cognitive bias — algorithm aversion vs. automation bias in audit risk assessment — extending the validated human-side measurement model into AI-augmented engagements. Grounded in current literature (Commerford et al. 2022, *JAR*; Fedyk et al. 2022, Eulerich et al. 2024, Estep et al. 2024, *RAST*; Emett et al. 2025, *Accounting Horizons*; PCAOB 2024 GenAI guidance).

Methods: survey design & validation, EFA/CFA, reliability analysis, PLS-SEM (specified), Jamovi/SPSS, Python data pipelines, Qualtrics; qualitative synthesis.

Teaching Readiness

Prepared to teach: Auditing (external & internal) · Accounting Information Systems · Internal Controls & SOX · Enterprise Risk Management · Behavioral Accounting / Judgment & Decision-Making · AI Governance & Responsible AI in Business · Data Analytics for Accountants.

Teaching-relevant experience:

- Adjunct application, Rutgers — Newark (2026): application package prepared [**CONFIRM status**]
- 15 years of professional training, supervision, and mentorship of audit staff at two global banks — workpaper coaching, methodology training, judgment-quality feedback
- Regular presenter to senior management and regulators; translated technical audit and AI topics for non-specialist audiences

Professional Experience (summary — practitioner credibility for the classroom)

Audit & Risk Leadership — Citigroup and JPMorgan Chase (15 years combined)

Internal audit and risk roles across consumer and institutional banking; led AI innovation within audit including a production retrieval-augmented-generation tool that cut audit cycle time ~35%; governance work spanning meeting-discipline controls across 15 business units.

Bank Examiner — OCC, Federal Reserve, FDIC [*CONFIRM years/agency order*]

Safety-and-soundness examination experience across regulated institutions — direct regulatory perspective for auditing and bank-management courses.

Certifications & Professional Affiliations

[**CONFIRM**: e.g., CPA / CIA / CISA / CFE — list only what is current]

Service & Ventures

- Founder (in development): *Audit the Algorithm* — governance-first AI advisory; informs case material on AI assurance.
- [**CONFIRM**: professional memberships — IIA, AICPA, ISACA chapters]
