Internal Audit — Corporate Treasury, Chief Investment Office and Risk

BNY

240 Greenwich Street, New York, NY 10286

Re: Vice President, Auditor — Corporate Treasury, Chief Investment Office and Risk

Dear Hiring Team,

Your posting is for an auditor of Corporate Treasury, the Chief Investment Office, and Risk. At JPMorgan Chase, my title was **Risk Control Manager, Treasury & CIO**. I would like to audit the function I used to run.

The first-line seat. For two years I owned the control framework for Treasury and CIO capital activities at JPMorgan — I defined the controls, the supervisor's expectations, and the escalation path, then built the monitoring behind them. Automating the capital and liquidity reconciliations took ~40% out of manual review and removed a recurring source of reporting error. When an auditor arrived, I was the one answering. I know where these controls are genuinely strong, where they depend on a spreadsheet nobody has re-performed, and which explanations fall apart under a second question.

Capital, stress testing, and liquidity. I led **CCAR** forecast validation and quantitative model challenge over a **\$2.6T** balance sheet under SR 15-18, alongside Finance, Treasury, and Model Risk. Before that, as Capital Controller in Basel Measurement & Analytics, I owned **Basel III RWA** and capital adequacy reporting for a **\$50B** book of equities, fixed income, and OTC derivatives — where reading the RWA treatment closely enough surfaced **\$180M** in capital optimization for CFO decision support. And I ran **Resolution & Recovery Planning** across 50+ stakeholders in Legal, Treasury, and Operations into Federal Reserve and FDIC submissions.

The audit craft is the other half, and it is current. For the past five years I was Vice President, Audit Manager at Citi Internal Audit, leading risk-based audits end to end across **15+ business units** — population and sample definition, control design and operating-effectiveness testing, issue dimensioning, and the opinion on the control environment. I led **consent-order** execution, authoring issue-closure and sustainable-closure evidence that quality assurance and external regulators accepted, and reported results to executive management and the Board Audit Committee.

And the standard was learned from the regulator's side. I began as a **bank examiner** with the Florida Office of Financial Regulation, running **CAMELS** safety-and-soundness examinations alongside federal banking regulators — capital, asset quality, earnings, liquidity, and market risk. I hold **FDIC Bank Examiner I**.

The honest gaps. I have not worked at BNY, and custody and investment-services businesses have a different shape from a universal bank's — the products are ramp. I hold FDIC Bank Examiner I rather than a CPA or CIA, though **CIA Part 1 is in progress**. I would rather state both plainly than have either surface later.

I am in Newark, a short commute to Manhattan. I would welcome the conversation.

Sincerely,

Yasir A. Malik
