SUMMARY

Builds and governs data products where the cost of bad data is a misfiled regulatory return. At Citi, consolidated **500+ legal-entity data sources** into governed master data — data modeling, ETL, ownership and **end-to-end lineage**, and the data-quality controls that made the output certifiable — serving downstream **FR 2900** and **TIC** regulatory filings at **99.8% accuracy**. Ships as well as governs: elicited requirements from the teams who needed it, wrote the code, and put a retrieval-augmented assistant into production (Python, LangChain) that cut review cycle time **~35%**; automated capital and liquidity reconciliations for **~40%** less manual review. Quantifies the case before building it — analysis of Basel III RWA treatment on a \$50B book surfaced **\$180M** in capital optimisation for CFO decision support. Partners across Data, Engineering, Legal, Treasury, and Operations at scale (50+ stakeholders on a single regulatory programme) and reports outcomes to executive management and the Board Audit Committee. **Registered Scrum Master**. MBA in Financial Mathematics; DBA candidate at FIU.

THE DATA-PRODUCT REQUIREMENTS, AGAINST THE RECORD

The posting asks for	Where it has been done
Ownership and ongoing maintenance of end-to-end data lineage for data products	Citi Global Legal Entity Management: owned 500+ consolidated sources with defined ownership, lineage, and access control through to the downstream consumers — and kept it running, not just delivered.
Data architecture: data structures, data modeling, ETL/ELT pipelines, warehousing, semantic layers	Data modeling and ETL across the GLEM consolidation; automated capital and liquidity reconciliation pipelines at JPMorgan; reporting and semantic layers delivered in Tableau and Power BI for downstream analytics consumers.
Governance, data privacy, and regulatory compliance across all products	The whole career. Data-quality certification under regulatory examination; consent-order issue closure with evidence accepted by external regulators; an AI governance framework referencing NIST AI RMF and SR 11-7.
Business cases with financial justification (ROI) and KPIs	\$180M in capital optimisation quantified for CFO decision support; ~40% and ~35% efficiency programmes measured and reported.
User research, stakeholder interviews, continuous feedback loops	Requirements for the workpaper assistant were elicited from the audit teams who would use it, then iterated against their feedback until it went to production.
Partnerships with Data, Engineering, PMO, and HRIS teams; matrixed delivery	Resolution & Recovery Planning across 50+ stakeholders in Legal, Treasury, Operations, Controllers, and Model Risk, to statutory deadlines, none of whom reported to him.
Executive-level communication; translate data architecture into business value	Executive and Board Audit Committee reporting; regulator-facing submissions to the Federal Reserve and FDIC.

TECHNICAL SKILLS

Data: SQL / RDBMS • data modeling • master data management • ETL pipelines (structured and unstructured) • data lineage • data quality and certification • data governance • regulatory data (FR 2900, TIC)

Analytics & reporting: Tableau • Power BI • Alteryx • Excel/VBA • SPSS • SAS • scikit-learn • descriptive statistics, regression, clustering

Build: Python • LangChain / retrieval-augmented generation • vector databases • SHAP / LIME explainability • GitHub Actions

Governance frameworks: NIST AI RMF • SR 11-7 model risk • COSO • Three Lines of Defense • SOX ITGC

PROFESSIONAL EXPERIENCE

Assistant Vice President, Global Legal Entity Management — Citi — 2012 – 2015

Tampa, FL • the data-product programme

- **Consolidated 500+ legal-entity data sources into governed master data** — data modeling, ETL, ownership and end-to-end lineage, and the data-quality controls that made the output certifiable. Enabled automated **FR 2900** and **TIC** regulatory filings at **99.8% accuracy**, with regulators as the downstream consumer.

Vice President, Audit Manager — Citi — Jul 2021 – Apr 2026

Internal Audit, Cross-Enterprise Program & Change Management | New York, NY

- **Took a tool from requirement to production:** elicited needs from audit teams, built a retrieval-augmented workpaper assistant (Python, LangChain, vector search, SHAP/LIME), integrated it with Alteryx workflows, and iterated on feedback — **~35%** faster review cycle.
- Defined the governance target state for AI adoption: use-case intake, risk tiering, a control library, and post-deployment monitoring KPIs, referenced to NIST AI RMF and SR 11-7.
- Led risk-based audits across **15+ business units** — including judging whether a data population was complete and trustworthy enough to test against. Consent-order issue closure accepted by quality assurance and external regulators. Executive and Board Audit Committee reporting.

Risk Control Manager, Treasury & CIO — JPMorgan Chase — Mar 2019 – Jun 2021

Capital Controls & Resolution and Recovery Planning | Jersey City, NJ

- **Automated capital and liquidity reconciliation pipelines:** **~40%** less manual review and a recurring source of reporting error removed.
- Ran Resolution & Recovery Planning across **50+ stakeholders** in Legal, Treasury, and Operations into Federal Reserve and FDIC submissions; led CCAR validation over a \$2.6T balance sheet under SR 15-18.

Capital Controller, Basel Measurement & Analytics — JPMorgan Chase — Sep 2017 – Feb 2019

Brooklyn, NY • preceded by Program Manager, CIB Resolution & Recovery Planning (2015–2017)

- Owned Basel III RWA and capital adequacy reporting for a \$50B book; analysis of RWA treatment identified **\$180M** in capital optimisation for CFO decision support.

Bank Examiner — Florida Office of Financial Regulation — Apr 2011 – Mar 2012

West Palm Beach, FL • earlier: Senior Business Analyst, Retail Credit Risk — Royal Bank of Scotland, Dubai (2008–2009)

- CAMELS safety-and-soundness examinations alongside federal banking regulators. At RBS, built credit-risk MIS over a \$500M+ retail portfolio in SAS, SQL, and Excel/VBA.

EDUCATION & CERTIFICATIONS

Doctor of Business Administration (DBA), Florida International University — in progress, • **MBA, Financial Mathematics, Florida International University** — 2011 • **B.Sc., Banking & Finance, London School of Economics** — 2005 • **Columbia Engineering FinTech Boot Camp** — 2021

Certifications: Registered Scrum Master • FDIC Bank Examiner I • GCP Social/Behavioral Human Research. *In progress:* CIA Part 1, IAPP AIGP.
