PROFILE

Started in retail credit risk at the **Royal Bank of Scotland in Dubai** in 2008, building the weekly MIS a \$500M+ portfolio ran on as the financial crisis broke and the bank itself went into government rescue. Moved into supervision while the damage was still being counted — examining state and national banks for the **Florida Office of Financial Regulation**, with an MBA in Financial Mathematics from **FIU**. Then spent the post-crisis rebuild inside **Wall Street's control system**: legal-entity data under examination at Citi, Basel III capital and CCAR validation over a **\$2.6T** balance sheet and Resolution & Recovery Planning into the Federal Reserve and FDIC at **JPMorgan Chase**, and internal audit at **Citi in New York**. Now working on the second rebuild, the one AI requires: authored Citi's AI governance framework, then built and shipped the system it governed. Doctoral research, back at FIU, examines how AI-assisted review degrades the professional judgment it was meant to support.
