Hiring Team — Chief Data & Analytics Office and Compliance

JPMorgan Chase & Co.

New York, NY and Jersey City, NJ

Re: Vice President, AI Governance, Regulatory Change and Compliance Product

Dear Hiring Team,

AI regulation is moving faster than most control frameworks. SR 26-2 replaced SR 11-7 in April and places generative and agentic AI outside its scope, so the controls a firm builds for those systems are now the controls that exist. That is the work I want to do at JPMorgan, where I spent six years as a Program Manager in the Commercial & Investment Bank, a Capital Controller and a Risk Control Manager.

I have written AI governance and then built what it governed. At Citi I authored an AI governance framework against the NIST AI Risk Management Framework: use-case intake, risk tiering, a control library, human-in-the-loop requirements and monitoring measures. Then I built and shipped the AI tool it governed, in Python and LangChain, and it cut review cycle time by about 35%.

I read regulation the way an examiner does. I was a bank examiner for the Florida Office of Financial Regulation before any of this, and at Citi I drove consent-order remediation to closure with evidence regulators accepted. Translating a new rule into risk-based controls, owners and evidence is the job I know best.

I deliver change across functions. At JPMorgan I coordinated 50+ stakeholders in Legal, Finance, Operations and Technology into Federal Reserve and FDIC submissions. My doctoral research at FIU studies how professional judgment changes when an AI answers first, which is the human-oversight question every AI rule now asks.

I would welcome a conversation about your AI, data and regulatory change agenda.

Sincerely,

Yasir A. Malik
