PROFILE

Hands-on governance program lead who runs the machinery of a risk program and writes its documents. At JPMorgan Chase he ran working groups end to end (agendas, pre-reads, action-item tracking, escalation) and wrote briefing materials for senior risk forums; at Citi Internal Audit he reported to senior management and the Board Audit Committee and wrote the governance framework for audit's own AI use against the **NIST AI RMF**. Reviews AI use cases for risk (intake, tiering, framework mapping), drafts policies, procedures and templates, and moves between program coordination and doing the work himself. Former bank examiner.
