SUMMARY

Internal audit executive applying for **Chief Auditor, Artificial Intelligence (Job Req 26962614)**. A background across Citi, JPMorgan, and the Florida Office of Financial Regulation spanning audit, technology, and data-focused mandates — the exact diversified background the role calls for. Track record of operating the role's dual mandate in miniature inside Citi Internal Audit today: **auditing AI** (governance, model risk, bias, fairness, hallucination, third-party AI) **and building with AI** (designed and shipped a RAG-based Workpaper Quality Assistant that cut audit cycle time ~**35%**, with NIST AI RMF, SR 11-7, and XAI controls baked into the tool). DBA candidate (FIU) researching bias in auditor judgment, extending to LLM-assisted decisions. Comfortable presenting to Audit Committees and engaging directly with Federal Reserve examiners.

Frameworks & regulations (per JD): IIA Standards • COSO • COBIT • NIST AI RMF & GenAI Profile • SR 11-7 • EU AI Act • ISO/IEC 42001 & 23894 • MLOps awareness • AI-specific security risks (prompt injection, adversarial inputs, data exfiltration).

Most relevant skills (per JD): Control Monitoring • Data Analysis • Industry Knowledge • Issue Management • Laws and Regulations • Professional Standards • Risk Management • Root Cause Analysis.

SELECTED HIGHLIGHTS

- **AI/GenAI assurance and tooling:** designed and deployed a RAG-based Workpaper Quality Assistant inside Citi IA — covering the full development lifecycle (use-case intake → model risk tiering → control library → post-deployment monitoring), with explicit treatment of bias, fairness, hallucination, and adversarial risks. **35%** reduction in audit cycle time.
- **Scale of regulator-facing audit work:** consent-order audit execution at Citi; CCAR forecast validation and qualitative model challenge over a **\$2.6T** balance sheet at JPMorgan; contributed materially to the Federal Reserve's "*not not-credible*" rating on JPMC's resolution plan.
- **Cross-domain coverage:** governance, technology, model risk, third-party, and regulatory reporting audits across **15+** business units.
- **Team-building & influence:** mentored **8+** auditors on responsible AI adoption; recognized with Citi's *Delivers with Pride* award for AI-powered audit quality assurance innovation.

PROFESSIONAL EXPERIENCE

Vice President, Audit Manager — Cross-Enterprise Program & Change Management

Citi • New York, NY • Jul 2021 – Present

- Operate Citi IA's de-facto pilot of the role this JD describes: independent assurance over AI/GenAI adoption combined with hands-on construction of AI-enabled audit accelerators.
- Designed and shipped a **RAG-based Workpaper Quality Assistant** that cut audit cycle time **~35%**. Embedded NIST AI RMF, SR 11-7, XAI (SHAP/LIME) explainability, prompt-injection guardrails, and human-in-the-loop controls so the assistant is itself auditable — addressing bias, fairness, hallucination, data-privacy, and adversarial-input risks at design time.
- Led consent-order audit execution strategy across enterprise change programs; aligned issue validation and sustainable closure evidence with **Federal Reserve** examiners.
- Directed global audits of strategic transformation initiatives across **15+ business units**, assessing program governance, third-party oversight, data integrity, and regulatory reporting effectiveness; strengthened readiness for supervisory review and regulatory challenge.
- Defined the AI/GenAI tooling roadmap for Internal Audit: use-case intake, model risk tiering, control library, and post-deployment KPIs (adoption, coverage expansion, cycle-time reduction, exception rate).
- Mentored **8+** auditors on responsible AI adoption, prompt engineering, and ethical decision-making in human–AI workflows; recognized with Citi's *Delivers with Pride* award for AI-powered audit quality assurance innovation.

Risk Control Manager — Treasury & CIO (Capital, CCAR & RRP)

JPMorgan Chase • Jersey City, NJ • Mar 2019 – Jun 2021

- Redesigned the enterprise capital control framework across Treasury and CIO, replacing manual, reactive controls with a centralized governance model and real-time feedback via CORE.
- Led **CCAR** forecast validation and qualitative model challenge over a **\$2.6T** balance sheet, aligning with **SR 15-18** and Federal Reserve expectations; automated reconciliations reduced manual review time **40%**.
- Directed **Resolution & Recovery Planning (RRP)** across **50+** cross-functional stakeholders, delivering regulator-ready submissions to the Fed and FDIC; strengthened governance, scenario analysis, and documentation standards.

Capital Controller — Basel Measurement & Analytics

JPMorgan Chase • Brooklyn, NY • Sep 2017 – Feb 2019

- Owned **Basel III** RWA calculations for a **\$50B** equity book (~**\$35B** RWA), decomposing trades to line-item exposures across fixed assets, securities, OTC derivatives, and embedded asset classes for optimal risk weighting.
- Identified **\$180M** in capital optimization opportunities through granular portfolio analysis and risk-weight reassignment.
- Built analytical models forecasting capital impact of strategic initiatives, supporting CFO-level decisions on capital allocation.

Program Manager — CIB Resolution & Recovery Planning

JPMorgan Chase • New York, NY • Mar 2015 – Sep 2017

- Coordinated firm-wide resolution planning across Legal, Treasury, and Operations; managed cross-functional dependencies on regulatory deliverables to the Fed and FDIC.
- Contributed materially to the firm's "**not not-credible**" rating from the Federal Reserve — a critical regulatory milestone requiring demonstration of resolvability under stress.

Assistant Vice President — Global Legal Entity Management

Citi • Tampa, FL • *Apr 2012 – Mar 2015*

- Centralized **500+** legal entity data sources into a single source of truth, eliminating reconciliation breaks across treasury, risk, and regulatory reporting.
- Automated **FR 2900** and **TIC** regulatory filings to **99.8%** accuracy, reducing filing prep time materially.
- Partnered with Compliance and Legal to standardize entity classifications, KYC linkage, and intra-group exposure reporting.

Bank Examiner — Safety & Soundness

Florida Office of Financial Regulation • West Palm Beach, FL • *Apr 2011 – Mar 2012*

- Conducted joint examinations of state and national banks using the **CAMELS** framework — capital adequacy, asset quality, management effectiveness, earnings, liquidity, and sensitivity to market risk.
- Authored examination workpapers and supported formal enforcement actions, remediation directives, and follow-up reviews for complex institutions.
- Completed FDIC Corporate University Bank Examiner I training.

Senior Business Analyst — Retail Credit Risk

Royal Bank of Scotland • Dubai, UAE • *Jan 2008 – Jun 2009*

- Built dynamic credit-risk MIS dashboards for a **\$500M+** retail portfolio across the Middle East using Excel/VBA, SAS, and SQL.

DOCTORAL RESEARCH & EDUCATION — Epistemic Risk & AI Governance

Doctor of Business Administration (DBA), in progress — Florida International University • in progress

Qualifying examination passed Jul 2026: Mitigating Anchoring Bias in Long-Term Auditor Engagements (IRB-25-0462). Dissertation in development — how auditor reasoning degrades under LLM assistance, with proposed control mechanisms aligned to SR 11-7 and NIST AI RMF.

MBA, Financial Mathematics — Florida International University • 2011

Pre-MBA, International Banking — Florida International University • 2007

B.Sc. Banking & Finance — London School of Economics (LSE) • 2005

FinTech Boot Camp — Columbia University • 2021

AI Catalyst Program (6-month immersive) — GrowthSchool • 2024–25

Certifications & training: FDIC Bank Examiner I • Registered Scrum Master • GCP Human Subjects Research (AI Ethics).

In progress (per role expectations): **CIA** (Part 1 sitting Q3 2026) • **CISA** • **IAPP AIGP**.

ENTREPRENEURIAL & ADVISORY

Founder — Audit the Algorithm (auditingai.github.io) • 2024 – Present

AI governance advisory for banks, asset managers, and fintechs. Services: bias detection, drift and sycophancy prevention, regulator-defensible AI control frameworks (NIST AI RMF, SR 11-7, EU AI Act), RAG and document-intelligence pilots, and human–AI workflow design.

TECHNICAL CAPABILITIES

AI / ML & Agentic: Python • PyTorch • TensorFlow • Scikit-learn • LangChain • LangGraph • CrewAI • RAG and Agentic RAG • Vector DBs (Pinecone, ChromaDB) • LLM fine-tuning • Prompt engineering • Model Context Protocol (MCP) • ReAct / Reflexion patterns • Hugging Face • Google ADK • Anthropic Claude API • Claude Code.

AI Governance & Model Risk: NIST AI RMF and GenAI Profile • SR 11-7 • ISO/IEC 42001 & 23894 • EU AI Act • Colorado AI Act • Bias detection and mitigation • XAI (SHAP / LIME) • Model validation and drift monitoring • AI red teaming • Fairness testing • Hallucination and jailbreak testing • Audit-trail design • LLM usage monitoring for regulated workflows.

Audit & Risk Frameworks: IIA Standards • Three Lines of Defense (3LOD) • COSO • COBIT • SOX ITGC • CAMELS • Basel III • CCAR / SR 15-18 • Resolution & Recovery Planning • Consent-order remediation.

Cloud & MLOps awareness: AWS SageMaker • OpenAI API • Anthropic Claude API • basic CI/CD and containerization concepts for ML deployment.

Data: SQL • SAP • Tableau • Alteryx • Power BI • Excel/VBA.

INTERESTS

Calisthenics & HIIT • AI automations (n8n) • Competitive chess • Cognitive science and applied epistemology • Mentoring and guest lecturing (FIU).

"The measure of intelligence is the ability to change." — Albert Einstein

And the measure of AI governance is knowing when that change becomes drift.
