SUMMARY

Builds data tooling for audit from inside the audit function. Designed and shipped a production retrieval-augmented Workpaper Quality Assistant (Python, LangChain, vector search, SHAP/LIME) that cut audit review cycle time ~35% at Citi Internal Audit — specified by the auditors who needed it, written by the auditor who could build it. Earlier, consolidated **500+ legal-entity data sources** into governed master data producing automated **FR 2900** and **TIC** filings at **99.8% accuracy** — ETL, data modeling, data-quality certification and governance, under regulatory examination. Quantitative training is formal: **MBA in Financial Mathematics**, and an active DBA whose completed study (IRB-25-0462) was a 55-item instrument designed and fielded under IRB approval. For an Embed team the differentiator is direction, not tooling alone — most analysts must learn what an auditor needs from a dataset. That has been answered from the other chair: sample selection, control-gap identification, and population completeness across **15+ business units**.

THE ROLE'S REQUIREMENTS, AGAINST THE RECORD

WHAT THE ROLE ASKS FOR	WHERE IT HAS BEEN DONE
Data modeling, data engineering, data governance, entitlements; ETL over structured and unstructured data	Citi Global Legal Entity Management: 500+ legal-entity sources into governed master data with ownership, lineage, and access control, feeding automated FR 2900 and TIC filings at 99.8%. Unstructured ETL: the retrieval pipeline over audit workpapers. Automated capital and liquidity reconciliations at JPMorgan, ~40% less manual review.
Data quality / "data blessing"; completeness of data sources and data integrity for audit use	Both sides of it: produced the certified data at Citi GLEM, and consumed it as the audit VP deciding whether a population was complete enough to test against across 15+ business units.
Build production-ready analytical tools to automate repeatable audit processes	RAG Workpaper Quality Assistant — Python, LangChain, vector search, SHAP/LIME, prompt-injection guardrails, integrated with Alteryx workflows. In production; ~35% cycle-time reduction. Built to be auditable itself.
Statistics — distributions, time series, correlation, regression; partnering with audit teams to source data and identify risk	DBA qualifying research (IRB-25-0462, Jul 2026): 55-item instrument designed and fielded under IRB approval. Credit-risk MIS over a \$500M+ retail portfolio in SAS and SQL. Five years as the audit VP those analytics partnerships exist to serve — risk assessment, audit planning, and the testing the analytic has to support.

TECHNICAL SKILLS

Languages & Data: Python • SQL / RDBMS • Excel/VBA • SAS • SPSS • ETL pipelines (structured and unstructured) • data modeling • master data management • data quality and certification • data lineage and governance

Analytics & ML: scikit-learn • regression and classification • clustering • descriptive statistics and distributions • time series • SHAP / LIME explainability • experiment design and statistical testing in SPSS

NLP & LLM: LangChain / LangGraph • retrieval-augmented generation and agentic RAG • vector databases (Pinecone, ChromaDB) • text analytics • prompt engineering • evaluation and red-teaming scripts • Hugging Face

Visualisation & Workflow: Tableau • Power BI • Alteryx • GitHub Actions • automated reporting

Audit & Risk: IIA Standards • COSO • SOX ITGC • Three Lines of Defense • continuous auditing • SR 11-7 model risk • NIST AI RMF

PROFESSIONAL EXPERIENCE

Vice President, Audit Manager — Citi

Jul 2021 – Apr 2026

Internal Audit, Cross-Enterprise Program & Change Management | New York, NY

- **Designed and shipped the RAG-based Workpaper Quality Assistant** — Python, LangChain, vector search over unstructured workpapers, SHAP/LIME explainability, prompt-injection guardrails, Alteryx integration. Requirements from audit teams, built and put in production: ~35% less review cycle time, and continuous coverage where sampling had been the only option.
- Led risk-based audits end to end across **15+ business units** — defining populations, sample selection, control-gap identification; evaluating control design and operating effectiveness across business, finance, and technology risk.
- Drove **consent-order remediation**: authored issue-closure packages and sustainable-closure evidence accepted by quality assurance and by external regulators.
- Built independent assurance over enterprise AI adoption — use-case intake, risk tiering, control library, monitoring KPIs. Executive and Board Audit Committee reporting; coached 8+ auditors. Citi *Delivers with Pride* recognition.

Risk Control Manager, Treasury & CIO — JPMorgan Chase

Mar 2019 – Jun 2021

Capital Controls & Resolution and Recovery Planning | Jersey City, NJ

- **Automated capital and liquidity reconciliations**, cutting manual review ~40% and removing a recurring source of reporting error — repeatable-process automation applied to capital data.
- Led **CCAR** forecast validation and quantitative model challenge over a **\$2.6T** balance sheet under SR 15-18, partnering with Finance, Treasury, and Model Risk.
- Ran Resolution & Recovery Planning across 50+ stakeholders in Legal, Treasury, and Operations, delivering regulator-ready submissions to the Federal Reserve and FDIC.

Capital Controller, Basel Measurement & Analytics — JPMorgan Chase

Sep 2017 – Feb 2019

Brooklyn, NY • preceded by Program Manager, CIB Resolution & Recovery Planning (2015–2017)

- Owned Basel III RWA and capital adequacy reporting across a **\$50B** book of equities, fixed income, and OTC derivatives; analysis of RWA treatment surfaced **\$180M** in capital optimization for CFO decision support.

Assistant Vice President, Global Legal Entity Management — Citi

2012 – 2015

Tampa, FL

- **Consolidated 500+ legal-entity data sources into governed master data** — data modeling, ETL, ownership and lineage, and the data-quality controls that made it certifiable; enabled automated **FR 2900** and **TIC** filings at **99.8% accuracy**.

Bank Examiner, Bureau of Bank Regulation — Florida Office of Financial Regulation

Apr 2011 – Mar 2012

West Palm Beach, FL • earlier: Senior Business Analyst, Retail Credit Risk — Royal Bank of Scotland, Dubai (2008–2009)

- Conducted CAMELS safety-and-soundness examinations alongside federal banking regulators. At RBS, built credit-risk MIS dashboards over a **\$500M+** retail portfolio using SAS, SQL, and Excel/VBA, supplying weekly decisioning input to portfolio leadership.

EDUCATION

Doctor of Business Administration (DBA), Florida International University — in progress. Qualifying examination passed Jul 2026: a 55-item instrument on anchoring in audit judgment (IRB-25-0462). Dissertation in development: *Anchoring Bias in LLM-Assisted Audit Judgment*.

MBA, Financial Mathematics, Florida International University — 2011 • **B.Sc., Banking & Finance, London School of Economics** — 2005 • **Columbia Engineering FinTech Boot Camp** — 2021

CERTIFICATIONS

FDIC Bank Examiner I • Registered Scrum Master • GCP Social/Behavioral Human Research. *In progress:* CIA Part 1, IAPP AIGP.
