

Audit the Algorithm

YASIR A. MALIK

GenAI Risk & Assurance Executive | Internal Audit • Model Risk (SR 11-7) • Responsible AI Governance | Doctoral Researcher in AI-Assisted Judgment
Newark, NJ • YasirAMalik@gmail.com • +1 (786) 704-8536 • linkedin.com/in/yasiramalik • github.com/MalikAI-786 • auditingai.github.io

EXECUTIVE SUMMARY

Audit and risk executive with 20 years across Citi, JPMorgan Chase, and the Florida Office of Financial Regulation, now focused on the risks generative AI introduces that legacy control frameworks do not see: sycophancy and judgment drift in AI-assisted decisions, automation bias, hallucination, adversarial input, and unmanaged third-party AI. A builder-auditor — authored an AI governance framework referencing NIST AI RMF and SR 11-7, and shipped the RAG assistant it governs (~35% faster audit review). Led consent-order remediation accepted by federal regulators, CCAR forecast validation over a \$2.6T balance sheet, and Resolution & Recovery Planning that earned the Federal Reserve's "not not-credible" rating. DBA candidate at FIU (GPA 3.81, expected 2028) whose research measures how expert judgment degrades under AI assistance — the human-factors half of AI risk that model validation alone cannot cover.

WHERE THE RESEARCH IS GOING

Stage	Work	Why it matters to an employer
Completed · Jul 2026	Empirical study of anchoring bias in long-term auditor engagements (IRB-25-0462, FIU)	Evidence on how expert judgment drifts under a persistent reference point — the same mechanism an AI recommendation creates.
In development	Dissertation: automation bias and judgment drift when auditors work with LLM assistants; controls aligned to SR 11-7 and NIST AI RMF	Turns "human in the loop" from a slogan into a measurable control with a test procedure.
Planned	Audit Judgment Drift benchmark; three-layer LLM audit model (governance / model / application) for bank supervision; open-source AI Audit Playbook	Reusable test assets a second line or Internal Audit can adopt directly, in regulator-legible vocabulary.

CORE COMPETENCIES

GenAI & AI Risk Identification (sycophancy, judgment drift, automation bias, hallucination, prompt injection, model drift, third-party AI) | AI Governance & Responsible AI (NIST AI RMF, EU AI Act, ISO/IEC 42001) | Model Risk Management (SR 11-7) | Internal Audit & Controls (Global Internal Audit Standards, 3LOD, COSO) | Consent-Order Remediation & Issue Closure | Regulatory Examination & Supervisory Engagement | CCAR / SR 15-18 • Basel III RWA • Resolution & Recovery Planning | Applied AI Build (RAG, LangChain, evaluation scripts, XAI — SHAP/LIME) | Executive & Audit Committee Reporting

PROFESSIONAL EXPERIENCE

Vice President, Audit Manager — Citi — Jul 2021 – Apr 2026

Cross-Enterprise Program & Change Management, Internal Audit | New York, NY

- Built independent assurance over enterprise AI/GenAI adoption — governance, model risk, bias and fairness, hallucination, adversarial robustness, and third-party AI — and defined the AI tooling roadmap for Internal Audit: use-case intake, risk tiering, control library, and post-deployment monitoring KPIs.
- Designed and shipped a RAG-based Workpaper Quality Assistant (Python, LangChain, SHAP/LIME explainability, prompt-injection guardrails) that cut audit cycle time ~35% — built so the AI tool was itself auditable.
- Led consent-order audit execution across 15+ business units; authored issue-closure packages and sustainable-closure evidence accepted by quality assurance and external regulators.
- Delivered executive and Board Audit Committee risk reporting; mentored 8+ auditors on responsible AI adoption and bias awareness. Citi *Delivers with Pride* recognition.

Risk Control Manager, Treasury & CIO — JPMorgan Chase — Mar 2019 – Jun 2021

Capital Controls & Resolution and Recovery Planning | Jersey City, NJ

- Led CCAR forecast validation and qualitative model challenge over a \$2.6T balance sheet under SR 15-18; automated reconciliations cut manual review ~40%.
- Directed Resolution & Recovery Planning across 50+ stakeholders in Legal, Treasury, and Operations, delivering regulator-ready submissions to the Federal Reserve and FDIC.

Capital Controller, Basel Measurement & Analytics — JPMorgan Chase — Sep 2017 – Feb 2019

Brooklyn, NY (preceded by Program Manager, CIB Resolution & Recovery Planning, 2015–2017)

- Owned Basel III RWA and capital adequacy reporting for a \$50B book; identified \$180M in capital optimization for CFO decision support.

Bank Examiner, Bureau of Bank Regulation — Florida Office of Financial Regulation — Apr 2011 – Mar 2012

West Palm Beach, FL

- Conducted CAMELS safety-and-soundness examinations of state and national banks alongside federal banking regulators; authored workpapers supporting formal enforcement actions.

EARLIER EXPERIENCE

Assistant Vice President, Global Legal Entity Management — Citi, Tampa, FL (2012–2015): Centralized 500+ legal-entity data sources into governed master data, enabling automated FR 2900 and TIC regulatory filings at 99.8% accuracy. Earlier: Senior Business Analyst, Retail Credit Risk — Royal Bank of Scotland, Dubai (2008–2009).

EDUCATION

Doctor of Business Administration (DBA), Florida International University — Expected 2028 | GPA 3.81 — research above.

Master of Business Administration (MBA), Florida International University — 2011 | GPA 3.8 • **B.Sc., Banking & Finance, London School of Economics** — 2005

• **Columbia Engineering FinTech Boot Camp** — 2021

ADVISORY, CERTIFICATIONS & TECHNICAL SKILLS

Founder, Audit the Algorithm (auditingai.github.io, 2024–): AI governance advisory for regulated financial services — bias and drift testing, regulator-defensible control frameworks, human–AI workflow design.

Certifications: FDIC Bank Examiner I • Registered Scrum Master • GCP Social/Behavioral Human Research (AI Ethics). *In progress:* CIA Part 1, IAPP AIGP.

Technical: Python • LangChain / LangGraph • RAG and agentic RAG • vector databases • prompt engineering • evaluation and red-teaming scripts • SHAP / LIME • SQL • Alteryx • Tableau • Excel/VBA • GitHub Actions.
