Profile: auditingai.github.io • Code and materials: github.com/MalikAI-786

PROFILE

Controls and audit leader who runs AI transformation the way control functions need it run. At Citi Internal Audit he took a generative AI assistant from use case to production: mapped the review workflow, set the outcome measure, wrote the **AI governance framework** it ran under (risk tiering, documentation, human review points, monitoring), drove adoption and measured the result (~35% faster review). Knows the Control Manager's world first-hand as a JPMorgan Risk Control Manager working in **CORE**; prototypes with **Claude Code**; FIU doctoral research on **how AI-assisted review changes professional judgment**.

SELECTED RESULTS

~35%	Faster review from an AI assistant taken from pilot to production, with human review built into the workflow and benefits measured	*Citi Internal Audit*
~40%	Less manual review after redesigning and automating first-line reconciliations	*JPMorgan Chase*
15+	Business units under programme, thematic, change and consent-order closure audits; team of 15 across New York, India and Canada	*Citi Internal Audit*

EXPERIENCE

Vice President, Audit Manager — Citi

Jul 2021 – Apr 2026

Internal Audit — Cross-Enterprise Program & Change Management | New York, NY

- **AI transformation, pilot to production:** diagnosed the workpaper review workflow, defined the use case and outcome measure, built a retrieval-augmented assistant in Python and LangChain for assisted review and quality monitoring, with prompt-injection guardrails and a person reviewing every output; ran adoption with users and measured benefits (~35% less review cycle time).
- **Responsible AI governance:** wrote the AI governance framework for audit's own AI use against NIST AI RMF: use-case intake, risk tiering, documentation standards, a control library, human-in-the-loop review points and post-deployment monitoring; presented progress, risks and decisions to senior management.
- **Programme and change audits:** led programme-management, thematic and change audits across **15+ business units** and co-led **consent-order closure** audits, testing delivery governance, dependencies, risk and issue management; closure evidence accepted by external regulators; led a team of **15 auditors**.

Risk Control Manager, Treasury & CIO — JPMorgan Chase

Mar 2019 – Jun 2021

First-Line Controls and Model Controls | Jersey City, NJ

- Owned first-line controls over Treasury and CIO **capital and liquidity**; redesigned and automated reconciliations, cutting manual review ~40%.
- Worked in **CORE**, the firm's control-management application, to document and maintain Treasury and CIO controls: the Control Manager's view of the product.
- Designed and implemented **model controls** for qualitative models and the attestation of quantitative models, including oversight of model overlays; worked through model testing to confirm the controls operated effectively.

Program Manager, CIB Resolution & Recovery Planning — JPMorgan Chase

2015 – 2017

Ran CIB's 165(d) resolution-planning programme across the business, Legal, Finance and Operations: plans, milestones, dependencies, risk and issue escalation, decision forums and executive status updates against regulatory deadlines.

AI-ASSISTED DEVELOPMENT

Uses **Claude Code** to prototype and run his own spec-driven, agent workflows: written specs and reusable skills, two agents with separate scopes coordinating through a shared hand-off file, automated document builds and quality checks.

EARLIER CAREER

Capital Controller, Basel Measurement & Analytics — JPMorgan Chase (2017–2019) • Assistant Vice President, Global Legal Entity Management — Citi, Tampa, FL (2012–2015) • Bank Examiner, Bureau of Bank Regulation — Florida Office of Financial Regulation, West Palm Beach, FL (2011–2012) • Senior Business Analyst, Retail Credit Risk — Royal Bank of Scotland, Dubai (2008–2009)

SKILLS

Programme delivery: discovery to implementation • roadmaps, milestones and dependencies • risk, issue and decision logs • governance forums and executive reporting • KPIs and benefits tracking • adoption, communications and training • Registered Scrum Master
AI and automation: generative AI and retrieval-augmented generation • assisted review, summarization and quality monitoring • human-in-the-loop design • NIST AI RMF • Claude Code • Python • SQL • Tableau • Power BI • Alteryx
Controls and operational risk: three lines of defence • control design and testing • process mapping and root-cause analysis • issue management • consent orders and regulatory examinations

EDUCATION, RESEARCH AND CERTIFICATIONS

Doctor of Business Administration, Florida International University — in progress; qualifying examination passed July 2026. Research on how AI-assisted review changes professional judgment; conference paper under review, AIB Latin America & Caribbean 2027.
MBA, Florida International University (Financial Mathematics certification) — 2011 • **B.Sc. (Hons), Banking & Finance, London School of Economics** — 2005
Certifications: FDIC Bank Examiner I • Registered Scrum Master • In progress: CIA Part 1, IAPP AIGP
