Faculty Recruitment — Lecturers and Adjuncts, Fall 2026

Rutgers Business School — Newark and New Brunswick

Rutgers, The State University of New Jersey

Re: Rutgers Business School, Lecturer/Adjunct (Part-Time), Fall 2026 — Posting 26FA0291

Dear Colleagues,

I am applying to teach in the Accounting and Information Systems unit, and I would be glad to be considered for Finance and Economics or Management Science and Information Systems as well. I live in Newark, a few minutes from the Washington Park campus, and I can teach in Newark, New Brunswick or Jersey City, in person or online. I am applying for Fall 2026 and would be glad to be considered for Spring 2027 and Fall 2027 as your needs arise.

What I would bring into the room is a career spent doing what the syllabus describes. I spent five years as a Vice President in Citi's Internal Audit function, leading risk-based audits across fifteen-plus business units and reporting findings to executive management and a Board Audit Committee. Before that I validated CCAR forecasts over a \$2.6 trillion balance sheet at JPMorgan Chase and ran Resolution & Recovery Planning into Federal Reserve and FDIC submissions. Before that I was a bank examiner for the Florida Office of Financial Regulation, conducting CAMELS examinations alongside federal banking regulators. When a student asks what a regulator actually does when they walk into a bank, I can answer from having been the person walking in.

I am also a doctoral candidate researching the thing your students will graduate into. My DBA at Florida International University examines anchoring bias in LLM-assisted audit judgment — how professional judgment shifts when a model supplies a confident starting point, and what a practitioner must do to show independent judgment was still exercised. It is a mixed-methods programme: a 55-item survey instrument, fielded under IRB-25-0462, now extended with a qualitative arm. I am not teaching about AI from the outside. I wrote Citi's AI control framework, and then I wrote the retrieval-augmented tool it governed in Python and LangChain and put it into production.

On teaching, I am returning to something I started rather than trying it for the first time. During my MBA I was a Graduate Assistant in FIU's Financial Literacy Lab, teaching undergraduates one-to-one and in small groups, and I tutored student-athletes in finance and quantitative coursework through the Student-Athlete Academic Center — teaching to a hard deadline, with eligibility riding on it. More recently I delivered an invited session on artificial intelligence in professional judgment to Professor Sumit Kundu's graduate course at FIU, and in August I led a doctoral seminar synthesising four papers on measurement in international business research.

In between, I taught professionals. I mentored eight-plus auditors at Citi in analytics-led testing and responsible AI use, and I designed and delivered the enablement that got a technical tool adopted by non-technical auditors who were sceptical of it. What I have not yet done is carry a semester-long university course from syllabus to final grades, and I would welcome co-instruction or a section alongside a faculty mentor for a first term.

Courses I am prepared to teach immediately: Auditing, Internal Auditing, IT Audit and Controls, Accounting Information Systems; Commercial Bank Management, Financial Regulation and Supervision, Risk Management; Business Analytics, Data Governance, AI Governance; Business Ethics and Corporate Governance. My CV maps these to your academic units.

Rutgers Business School is the school in my own city, and the students in Newark are the ones I would most like to teach — many of them heading into exactly the audit, risk and compliance roles I have spent my career in, at firms twenty minutes away. I would be glad to discuss where I could be most useful this term.

My dissertation chair at FIU, Dr. Juan Ray, has offered to write in support, and my research and teaching materials are public at auditingai.github.io/research.html.

Sincerely,

Yasir A. Malik
