

YASIR A. MALIK

Program Manager — Security, Risk & Control Programs | Cross-Functional Execution from Ambiguity to Handoff | AI and Automation in Real Workflows

New York, NY (Newark, NJ) • YasirAMalik@gmail.com • +1 (786) 704-8536 • linkedin.com/in/yasiramalik • github.com/MalikAI-786

PROFILE

Structured operator who builds and owns **cross-functional programs** in security, risk and control domains, from an ambiguous starting point through execution and durable handoff. Ran **Resolution & Recovery Planning** at JPMorgan Chase — the program that maps every system, contract, person and dependency a legal entity needs to operate on Day 1 — across **50+ stakeholders** in Legal, Treasury, Technology and Operations, none reporting to him, to regulator deadlines. Built a new program and workflow at Citi from nothing: the intake path, risk tiering, control library, playbooks and monitoring measures for AI use, then the **AI tool itself**, adopted in production at ~35% less review time, with human review kept where the judgment lives. Finds the underlying issue behind a recurring exception because that was the job as a bank examiner and as the audit lead who closed a consent order across **15+ business units**. Brings systems thinking to ambiguity and builds scalable frameworks teams adopt in practice.

SELECTED RESULTS

50+	Stakeholders in five functions coordinated into Resolution & Recovery submissions to the Federal Reserve and FDIC; dependencies, milestones and decision rights made explicit	JPMorgan Chase
~35%	Less review time from an AI workflow tool he built and drove to adoption; edge cases and risk decisions kept under human review	Citi
15+	Business units taken through consent-order remediation: intake, corrective action plans, validation, handoff to ongoing owners, evidence accepted by regulators	Citi

EXPERIENCE

Vice President, Audit Manager — Citi

Jul 2021 – Apr 2026

Internal Audit, Cross-Enterprise Program & Change Management | New York, NY

- **Built a new program and operating model for AI use** that teams adopted in practice: intake path, risk tiering by criticality, control library mapped to NIST AI RMF, playbooks, decision points and monitoring measures — then applied it across Technology, Risk, Compliance, Legal and Privacy partners.
- **Used AI and automation to improve a real workflow:** specified, built and shipped a retrieval-augmented review assistant (Python, LangChain) that organises information, surfaces gaps and improves documentation; earned adoption by iterating with its users; kept human review of every risk decision and handled sensitive data within the firm's controls.
- **Owned a cross-enterprise remediation program** under a regulatory consent order across 15+ business units: root cause of recurring exceptions and bottlenecks, corrective action plans with owners and dates, program-level visibility of risks, milestones and dependencies, and handoff to ongoing owners with closure evidence accepted by external regulators.
- Reported status, risks and tradeoffs to executives and the Board Audit Committee; coached 8+ auditors.

Risk Control Manager, Treasury & CIO — JPMorgan Chase

Mar 2019 – Jun 2021

Resolution & Recovery Planning and Capital Controls | Jersey City, NJ

- **Ran Resolution & Recovery Planning** — the readiness program that inventories the systems, people, contracts and dependencies a legal entity needs to keep operating through a transition — across **50+ stakeholders** in Legal, Treasury, Technology and Operations; scoped, planned and executed the annual cycle to Federal Reserve and FDIC deadlines and made responsibilities and decision rights clear.
- Owned the first-line control framework for Treasury and CIO capital activities; automated reconciliations cut manual review ~40% and removed a recurring exception at its source.

Capital Controller, Basel Measurement & Analytics — JPMorgan Chase

Sep 2017 – Feb 2019

Brooklyn, NY • preceded by Program Manager, CIB Resolution & Recovery Planning (2015–2017)

Owned Basel III capital reporting across a **\$50B** book; analysis surfaced **\$180M** in capital optimisation. Earlier, as Program Manager, ran the CIB resolution-planning workstream through two annual cycles.

Assistant Vice President, Global Legal Entity Management — Citi

2012 – 2015

Tampa, FL

Consolidated **500+ legal-entity data sources** into one governed dataset with clear ownership, lineage and quality controls, automating regulatory reporting at **99.8%** accuracy — the system of record for the firm's legal-entity structure.

Bank Examiner — Florida Office of Financial Regulation

Apr 2011 – Mar 2012

earlier: Senior Business Analyst, Retail Credit Risk — Royal Bank of Scotland, Dubai (2008–2009)

Examined banks alongside federal regulators; presented findings to boards.

SKILLS

Programs: cross-functional program management • diligence, Day 1 readiness and integration planning • onboarding of people and systems • scalable frameworks and processes • intake paths, playbooks, checklists and handoff standards • decision rights and RACI • dependency, milestone and risk tracking • measures of success • executive and technical communication • operating-model design • agile delivery (Registered Scrum Master)

Risk & security domains: technology and third-party risk • GRC • privacy and data handling • NIST AI RMF • regulatory remediation • business continuity and resolution planning

AI & automation: generative AI and LLMs • retrieval-augmented generation • LangChain • Python • SQL • Alteryx • workflow automation with human review of risk decisions

EDUCATION

MBA, Florida International University — 2011 • **Doctor of Business Administration, Florida International University** — in progress; dissertation in development on where human judgment must remain in AI-assisted work • **B.Sc., Banking & Finance, London School of Economics** — 2005

Certifications: Registered Scrum Master • FDIC Bank Examiner I • GCP Social/Behavioral Human Research; in progress IAPP AIGP and CIA Part 1.
