## PROFILE

Controls and reporting lead who builds the single trusted view of a multi-project portfolio and keeps the data behind it honest. At JPMorgan Chase he ran consolidated milestone tracking for the firm's Section 165(d) resolution-planning program across the business, Legal, Finance and Operations, and traced reported numbers back to source trades to fix data at the source. At Citi Internal Audit he audited large technology, infrastructure and change programs, testing schedules, milestones, status reporting and variance to plan. Builds executive dashboards in Power BI and Tableau and writes his own reporting and data-quality tools with AI-assisted development (Python, Claude Code).
