SUMMARY

Delivers complex cross-divisional programs in banking, against deadlines that do not move and audiences that do not accept hand-waving. Ran **Resolution & Recovery Planning** at JPMorgan Chase across **50+ stakeholders** in Legal, Treasury, and Operations into Federal Reserve and FDIC submissions, after serving as **Program Manager for CIB Resolution & Recovery Planning** coordinating deliverables across legal entities, controllers, and Treasury. Led consent-order remediation across **15+ business units** at Citi, tracking every action and issue to closure with evidence external regulators accepted. The AI half is not aspiration: authored an AI governance framework — use-case intake, risk tiering, control library, post-deployment monitoring KPIs — which is a target-state operating model for an AI-enabled function, then gathered requirements, wrote the code, and put the tooling into production. Most project managers on an AI transformation have to learn the risk-and-control half; that half is the career.
