SUMMARY

Risk and control leader across Citi, JPMorgan Chase, and the Florida Office of Financial Regulation, with the examiner's view of what a supervisor expects a third-party programme to evidence. At Citi Internal Audit — the **Cross-Enterprise Program & Change Management** function — assessed third-party and vendor oversight across **15+ business units**, judging whether due diligence, risk tiering, and ongoing monitoring actually worked rather than whether the file was complete. Authored consent-order issue-closure and sustainable-closure evidence accepted by quality assurance and by external regulators. Built assurance over enterprise AI adoption end to end — use-case intake, risk tiering, control library, post-deployment monitoring KPIs — the same architecture a global third-party lifecycle needs. Ran Resolution & Recovery Planning across **50+ stakeholders** in five functions, none reporting to him, into Federal Reserve and FDIC submissions against statutory deadlines. MBA in Financial Mathematics; DBA candidate at FIU in Miami.

THE ROLE'S REQUIREMENTS, AGAINST THE RECORD

WHAT THE ROLE ASKS FOR	WHERE IT HAS BEEN DONE
Maintain and enhance a global third-party risk and onboarding programme; subject-matter expertise across stakeholders	Citi Internal Audit, Cross-Enterprise Program & Change Management: third-party and vendor oversight assessed across 15+ business units, US and offshore — due diligence quality, risk tiering, contractual control coverage, and whether ongoing monitoring of critical vendors was operating rather than documented.
Risk assessments for new vendors and technologies; regular review of high and critical vendors	Built independent assurance over enterprise AI adoption, third-party AI included: use-case intake, risk tiering by criticality, control library, post-deployment monitoring — a new-technology intake and re-review cycle, designed and operated.
Remediation, mitigation and contingency plans; process, policy and procedure enhancement	Consent-order remediation; issue-closure and sustainable-closure evidence accepted by quality assurance and external regulators. Authored an AI governance framework (NIST AI RMF, SR 11-7) and its procedures. Resolution & Recovery Planning is contingency planning at firm scale — Federal Reserve “not not-credible” rating.
Global regulatory compliance; monitor standards and drive readiness for change	Bank Examiner, Florida Office of Financial Regulation — CAMELS examinations alongside federal banking regulators. Works to the Interagency Guidance on Third-Party Relationships (2023) and FFIEC outsourcing expectations; delivered under CCAR / SR 15-18 and Basel III.
Partner with sourcing, legal, compliance and IT on contracts; manage teams, including distributed and virtual; publish KPIs and SLAs	RRP across 50+ stakeholders in Legal, Treasury, Operations, Controllers and Model Risk into regulator-ready submissions. Led audit teams across 15+ business units and coached 8+ auditors , working across New York, Tampa, Jersey City and offshore centres. Defined monitoring KPIs and reported to executive management and a Board Audit Committee.
